### EXPERIENCE

Throughout his 19 year career Michel has assisted organisations from a diverse number of industries implement and refine their Health, Safety and Environmental Management Systems to Best Practice standards.

For the past eleven years, Michel has worked exclusively in the oil and gas industries and their associated heavy industry vendors and suppliers. Clients include AGL, AGR, BHP, BP, Caltex Australia, Conoco Phillips, ExxonMobil, Methanex, Origin Energy, Shell Australia, Santos, Transfield Services and Woodside Petroleum.

Michel's initial involvement in the oil and gas industry centred around his role as the HSE Manager for a high profile contractor performing specialist project work for the majority of oil and gas organisations throughout Australia, Asia and the United States.

For the past four years, Michel has assumed project specific roles with a number of oil and gas clients to facilitate the review of specific operational and HSE procedures, coordinate the HSE aspects of their

maintenance shutdowns and, develop and facilitate a range of training non-accredited and facilitate nationally accredited training courses.

Prior to his involvement in the oil and gas industry, Michel worked for a number of years for Woodward-Clyde International (a global environmental engineering corporation). He completed work for the US Department of Defense/Federal Government (Superfund site in Colorado), the mining industry within the US and Australia, a number of chemical manufacturers and heavy industry manufacturers.

As a qualified trainer with extensive hands on field and managerial experience, Michel has developed and facilitated a range of HSE training programs, ranging from non-accredited managerial and general awareness sessions to nationally accredited skills orientated courses.

His passionate commitment to HSE and training ensures that his approach to training removes the complexities of the subject matter through practical workplace examples which ensures participants get maximum value and information from their interaction.

He has developed and assisted numerous companies attain ISO 9001 certification (1994 and 2000 versions), and has conducted third party compliance HSE audits for clients in the petrochemical industry.
