Description

This program is designed to provide individuals with the skills and knowledge required to provide advanced first aid management, life support, and management of casualties, the incident and other first aid situations.

Course Content

Theory

- Hazard and risk management
- Prioritise needs and resources
- Body systems
- Casualty assessments
- Patient examination/vital signs
- Casualty assessment plans
- Manage multiple casualties
- Triage - control the effects of injuries

- Manage medical injuries / conditions
Moving casualties
- Use of Oxygen and AED
- Coordinate support services

Practical

- Perform simulated CPR for 2 minutes (Adult, child and baby)
- Use an AED (trainer model)
- Responding as a first aider to several scenarios

Prerequisites

There are no specific pre-requisites for this course although learners should ensure they do not suffer from a medical condition which could be aggravated by physical or psychological stress and must be over 18 years of age.

Assessment

The theory assessment consists of multiple choice and short answer questions.

The practical assessment will require Learners to demonstrate the ability to assess the situation, apply advanced first aid procedures, manage casualties with injuries and medical conditions, triage and manage resources, communicate details of the incident and evaluate own performance.

Language, Literacy and Numeracy

There are specific language, literacy and numeracy requirements for some of content of this course, to be deemed competent you must be able to:

- Read and correctly interpret required documentation relevant to the assessment and management of injuries/illnesses
- Speak clearly and unambiguously in English
- Explain, describe and verify sometimes complex needs and issues

Writing is required to the level of completing workplace forms and producing the required reports.

Numeracy is required to the level of being able to correctly differentiate between pressures and temperatures.
